Talk by

***Dr. Errol Arkilic, a program manager in the SBIR/STTR program at  
NSF***

Time: Friday, November 4, 2005, 11 am

Place: Rm. 201 Charles B. Wang Center

Dr. Errol Arkilic is a program manager in the SBIR/STTR program at NSF where he focuses on IT and Security Technologies. He will talk about an emerging SBIR grant program focused on supporting new business opportunities.

Dr. Errol Arkilic joined The National Science Foundation in October '03. He is one of ten program managers in the SBIR/STTR program at NSF where he focuses on IT and Security Technologies. Before joining NSF, he was President and CEO of StrataGent Life Sciences – a venture-backed startup in San Francisco Bay area. Prior to StrataGent, Errol was President of Phasyn, Inc. (a developer of packaging technologies for optical components) and Manager of Product Engineering at Redwood Microsystems, both in the Bay area. He holds a Ph.D. from MIT.

The talk is jointly sponsored by the Sensor Consortium and Stony Brook Technology Licensing Office
