Talk by

Jim Lynch,

Business Development Manager,

Emerging Business Group, Agilent Technologies

Time: Monday, December 19, 2005, 10 am

Place: Rm. 250, Light Engineering Building

Agilent is a major company with 20,000 employees that provides core electronic and bio-analytical measurement tools to advance the electronics, communications, life science research, environmental and petrochemical industries.

Jim will come from Connecticut and begin by giving a presentation (*Room 250 at 10:00am*) about how his company works with universities, which includes collaborative research, equipment donations, internships, etc.
